PROFESSIONAL SUMMARY

Junior Full Stack Developer transitioning from Electronics to Software Engineering, with hands-on experience building backend services, REST APIs, automation workflows, and Full Stack applications using JavaScript, TypeScript, Node.js, React, Python, and SQL.

Currently pursuing a degree in Software Development at BYU-Idaho, with strong exposure to CI/CD, Docker, cloud fundamentals, and clean architecture concepts. Known for a self-directed mindset, rapid learning ability, and strong problem-solving skills.

CORE TECHNICAL SKILLS

Languages & Backend: JavaScript (ES6+), TypeScript, Python, Node.js, Express

Frontend: React, HTML, CSS, Responsive Design

Databases: PostgreSQL, MongoDB

Automation & Integration: REST APIs, Webhooks, OAuth 2.0, workflow automation concepts (n8n, Make)

DevOps & Cloud: Git, GitHub, GitHub Actions, Docker, Azure fundamentals

Architecture: Clean Architecture, DDD concepts, OOP (C#, C++)

PROFESSIONAL EXPERIENCE

Electronic Technician – Perto S.A. (Jul 2021 – Aug 2025)

- Resolved 200+ system incidents, reducing average repair time by ~30%.
- Collaborated in multidisciplinary teams with strong documentation and process adherence.
- Applied structured troubleshooting and root-cause analysis transferable to software debugging.

Junior Developer – Academic & Personal Projects (BYU–Idaho) (Jul 2024 – Present)

- Developed RESTful APIs using Node.js and TypeScript with authentication and persistence.
- Built Full Stack applications using React.
- Gained hands-on experience with Docker and basic CI/CD pipelines.

EDUCATION

Bachelor's Degree – Software Development, BYU–Idaho (2024 – Present)

Technical Degree – Electronics, Fundação Bradesco (Completed 2021)
